

ANIELLO CRISTO

Designer & Developer

I design mobile first, responsive website using HTML 5 and CSS3.

Currently, I am expanding my knowledge of JavaScript and in the process I have already worked with technologies such as jQuery, JSON, and multiple public API's. I believe in the beauty of simplicity, as it applies to all aspects of web design and programming. I value efficiency as much as creativity and favor legible and reusable code in such a way that it is easy to scale, maintain and debug. My formal educational background is Architecture. It was in that program I learned the very fundamentals of design that transcend all disciplines of creativity.

EXPERIENCE

Designer/Developer as Freelancer (2016 - Present)

I design website for clients based on their goals and needs. Typical responsibilities range from the design itself to creating and managing content.

Associate Project Manager at JLL (2015 - 2017)

I prepared project management reports and meeting minutes, supervise site work at various locations around the United States during different construction phases of different projects. Additionally, I would assist in defining scope of work for a given project, and create/estimate project budgets from the anticipated work.

Architectural Intern at Stucky Vitale Architects (2014- 2015)

I planned and developed construction documents in support of health, hospitality, food service, residential, as well as several other building types. Collaborating with engineers to communicate and execute the client's design needs was also a major responsibility.

EDUCATION

University of Detroit Mercy - B.S. Architecture (2009 - 2012)

The Architecture program at UDM laid a foundation of layout and presentation followed by space planning and programming to final product delivery.

CERTIFICATIONS

LEED Green - Associate (2016 - Present)

The US Green Building Council certificate is issued to those who demonstrate understanding in efficient and environmentally sustainable methods.

SKILL SET

HTML

CSS

JavaScript

jQuery

SKETCH 3

ILLUSTRATOR

INDESIGN

PHOTOSHOP

GIT

POSTMAN

WORDPRESS

MICROSOFT OFFICE

VOLUNTEER WORK

Habitat for Humanity - Designer (2012)

I measured homes acquired for rehabilitation and drew plans for office records and submission for permits. I was additionally tasked with redesigning the existing office space for expansion in anticipation of future growth.
